

# Transportation Pooled Fund Program

## International Participants:

Welcome international partners to the Pooled Fund Website and the Pooled Fund Program. International participation in the Pooled Fund Program is welcomed and encouraged. Your participation is a great addition to the program and we are excited to have you involved in this important program. Any country with a treaty in good standing with the US Government is welcome to participate.

How to Participate: The contracting and acquisition laws and regulations of FHWA or the Lead state, if the project is led by a State DOT, will govern the project delivery process including such things as consultant selection, contract management, and reporting.

- Partner countries can be provided a User ID and Password to the Pooled Fund Website to enable them to view current projects and solicitations as well as make a financial commitment to any project in which they decide to participate. They can also be added to a list to receive automatic e-mails notices of new posted solicitations
- For FHWA Pooled Fund led projects, foreign government funds are transferred via Pay.gov to FHWA and placed under a FHWA-led Pooled Fund Project. Procedures for using pay.gov are also under this “How to Participate” tab.
- Funds provided to a State led Pooled Fund Project are handled between the State DOT and the country involved. Unless a fund transfer is worked out between the lead state and the country involved, a check must be sent to the lead state for participation in the project.
- For more information on the Pooled Fund Program, please see the “Pooled Fund Procedures Guide” posted on the website.

Again, welcome to the Pooled Fund website and the Pooled Fund Program and thank you for your interest in this exciting program.
