**INSTRUCTIONS:**
Project Managers and/or research project investigators should complete a quarterly progress report for each calendar quarter during which the projects are active. Please provide a project schedule status of the research activities tied to each task that is defined in the proposal; a percentage completion of each task; a concise discussion (2 or 3 sentences) of the current status, including accomplishments and problems encountered, if any. List all tasks, even if no work was done during this period.

**Project Description:**

The objective of this project is to provide technical support for the implementation of Building Information Modeling (BIM) for Bridges and Structures under the direction of AASHTO COBS Technical Committee on Technology and Software (T-19) and the Transportation Pooled Fund TPF-5(372) Technical Advisory Committee (AASHTO COBS T-19/Pooled Fund). BIM has been widely used in the commercial sector for vertical construction to manage projects from conception through design, fabrication, construction and future asset management and maintenance. Although some fabricators who perform work on both building construction and transportation structures have begun employing BIM tools in the fabrication of bridge components, BIM use in transportation infrastructure is severely limited due to the lack of standardization. To take advantage of the efficiencies associated with the use of BIM in transportation structures, a comprehensive strategic plan by AASHTO COBS T-19 is needed.

**PROJECT SCOPE:**

1. **Investigation and Exploration**  
   (University of Florida to Lead / Fair Cape Consulting to Support)  
   The consultant team is performing research to find comparative implementation efforts of common data standards within the infrastructure industry. These common efforts will require a shared vocabulary and definition of terms. The consultant team will document and report the common industry efforts and make terminology recommendations.  
   *Current % complete for this task: 75%*

2. **IFC Development**  
   (AEC3 / University of Florida)  
   The main technical achievements will be performed by the consultant team under "IFC Development" work package including developing interoperable solutions starting with process and use case definitions, continuing with the information delivery specification, formalizing the exchanges by creating a model view definition and by supporting the software industry through anticipation, deployment and certification of the IFC interfaces.  
   *Current % complete for this task: 10%*

3. **Economic Analysis**  
   (HDR Lead)  
   In order to support the decision-making process of each state DOT, an economic analysis will be performed, focusing on the benefits and costs of adopting standards for information modeling to facilitate the exchange of models and data. The team will explore how enhanced interoperability affects operational expenses, savings in information verification costs, improvements in workflows, and enhancements in collaboration.  
   *Current % complete for this task: 0%*

4. **Industry Organization**  
   (Jeff Ouellette Lead, HDR Support)  
   The current roadmap that AASHTO COBS T-19/Pooled Fund developed two years prior to the start of this project is in need of an update to show an achievable plan with actionable goals based on current industry activity. The consultant team will update the roadmap of BIM for bridges and structures. Involvement with bSI is critical for allowing AASHTO COBS T-19/Pooled Fund to have a voice in the development of this national standard. Recommendations and long-term strategies will be developed. Governance of this program will require the cooperative involvement of key industry stakeholders. The consultant team will review the current governance model to assure the structure and assignments are relevant. Recommendations on how to best maintain influence on direction and development of IFC will be developed. The leadership of the governance body will need to support key relationships with bSI, an international organization with chapters worldwide. The consultant team will work with AASHTO COBS T-19/Pooled Fund to create a plan to facilitate this engagement. Task 4.2 Governance and Stewardship Model will be completed in contract year 2 via contract amendment.  
   *Current % complete for this task: 80%*

5. **Development and Implementation**  
   (Fair Cape Consulting / HDR Co-Lead)  
   The consultant team will build an Engagement and Implementation Plan that is focused on design and development of industry tailored tools and tactics. Our team will identify and leverage the balance between the right message and the appropriate approach for engagement and meaningful dialogue. HDR will also support states implementing the national standard to clarify what that product is. Having a tangible, common end-goal will allow independent areas to mature.
concurrently. HDR will develop an implementation plan that supports this goal. Tasks 5.2 Engagement Tool Kit Development and 5.3 Implementation Support will be completed in future contract years due to budget constraints. 
*Current % complete for this task: 85%

**6 Management and Coordination**

(HDR Lead)

This task includes management of budget and schedule, project reporting, coordination with AASHTO COBS T-19/Pooled Fund, internal coordination with consultant team, and quality control review of deliverables.  
*Current % complete for this task: 80%

Note: The percentage completion values shown correspond to the percent complete of year 1 effort under the current one-year contract. The project is anticipated to last through 2022 with contract renewals at the end of each calendar year.

### Progress this Quarter (includes meetings, work plan status, contract status, significant progress, etc.):

**Q3 2019**

**Progress Achieved:**

**Task 1 Investigation and Exploration**
- Aggregation of relevant IDM terminology in a database
- Identification of exchange requirements (BrIM data dictionary)
- Issued draft report

**Task 2: IFC Development and Verification**
- Ongoing effort on validation of Bridge Lifecycle Process map
- Development of interactive pdf for the Bridge Lifecycle Process Map
- Met with consultant team from BIM for Bridges Demonstration project to discuss FHWA Design to Construction MVD
- Assessment of the impact of the international Bridge Design Transfer View (DTV) MVD to the project and development of a recommendation on how to move forward
- Design to Fabrication Process Map
- Aggregation of relevant IDM terminology in a database
- Identification of exchange requirements (AASHTO/NSBA BrIM data dictionary)

**Task 3: Economic Analysis**
- No activity (This task is due to start in 2022.)

**Task 4: Industry Organization**
- Development and submittal of Roadmap Review and Update Recommendations draft report
- Internal review of Roadmap draft report

**Task 5: Implementation and Collaboration**
- Coordination with Working Group 4/Education & Engagement
  - Selected URL for Collaboration Site
  - Released for review: Collaboration Site mock-up and landing page
  - Launched the Collaboration Site landing page
- Ongoing development of Engagement Plan
## Task 6: Project Management and Coordination
- Coordination with pooled fund executive committee on recent deliverables and miscellaneous items
- Development of draft scope for contract Year 2
- Held quarterly online meeting with full pooled fund on 9/16/19

### Anticipated work next quarter:

**Task 1: Investigation and Exploration**
- Review comments for Task 1.1 Draft Report on Documentation of existing BIM efforts
- Review comments Task 1.2 Draft aggregation of common terminologies
- Hold WG1 deliverable review meeting
- Complete final reports for Tasks 1.1 and 1.2

**Task 2: IFC Development and Verification**
- Submit draft Design to Fabrication Process Map for industry review
- Continue developing Design to Fabrication IDM (terminology, exchanges, etc.)
- Complete a use case for exchange model requirements to be mapped to IFC
- Organize and hold the Design to Fabrication requirements documentation workshop
- Complete and submit plain language narrative for the Design to Fabrication IDM
- Continue Analysis of current IFC 4.2 Effort

**Task 3: Economic Analysis**
- No activity (This task is due to start in 2022)

**Task 4: Industry Organization**
- Receive client comments on the Roadmap Draft Report and develop Final Roadmap Report
- Complete and submit Roadmap Update Final Draft Report
- Hold software vendor engagement quarterly meeting
- Review of vendor roadmaps to support IFC and development of Draft Vendor Roadmap Alignment Report

**Task 5: Implementation and Collaboration**
- Continue work on Collaboration Forum development and obtain pooled fund feedback
- Finalize and submit Draft Stakeholder Engagement Plan

**Task 6: Project Management and Coordination**
- Internal meetings and pooled fund/working group meetings as needed
- Finalize Year 2 scope
- Hold quarterly online meeting/Year 2 kickoff with full pooled fund on 12/11/19

### Significant Results:
- None at this time
Circumstance affecting project or budget. (Please describe any challenges encountered or anticipated that might affect the completion of the project within the time, scope and fiscal constraints set forth in the agreement, along with recommended solutions to those problems).

None at this time.

Potential Implementation:

Nothing to report at this time.
