

QUARTERLY PROGRESS REPORT

April 1, 2014 to June 30, 2014

This pooled fund enables FHWA to maintain annual licensing for the most recent version of the Surface Water Modeling System, WMS Version 11.1, and distribute it to all state DOTs. In this period a total of 38 SMS licenses were distributed to 13 states.

SMS 11.2 includes the SRH-2D interface for the current version of SRH-2D, which does not yet include the new hydraulic structures features (culvert flow, weir flow, bridge pressure flow, gates, etc.).
